POWER

A dedicated 220V outlet within 30 metres of where the bay will stand, on a flat, level surface. We bring a 30 m industrial extension lead, so the outlet does not need to be close — just within reach.

SIGNAL

We bring our own cellular hotspot to run the software. Venues with weak reception — basements, parking garages, shielded exhibition halls — need to give us access to venue Wi-Fi instead.

CLUBS

We supply the clubs, so nobody needs to bring equipment. Our set is right-handed. Left-handed guests are welcome to bring their own — let us know in advance.

ACCESS

For venues and exhibitions, please arrange permits, security passes and loading dock access before we arrive, so the build can start on time.

THE THREE SETUPS

SPACE REQUIRED

Pick the setup that fits your venue.

Ceiling height is the measurement worth checking first. The figures below are the structure itself, standing on a flat, level surface — we confirm the working clearance your setup needs in writing before the booking. Build time happens **before** your booked hours start, so you get the full session.

FROM R 3 500 • 3-HOUR MINIMUM

Backyard

Our most compact setup. Fits most residential lawns, patios and double garages — ideal for birthdays, braais and private gatherings at home.

BUILD

FROM R 6 000 • 4-HOUR MINIMUM

Outdoor Enclosure

Our premium footprint — a fully enclosed, branded structure built for wine estates, weddings, school events and large activations. Your own branding can be printed onto the panels.

BUILD

R 10 000 HALF DAY • R 15 000 FULL DAY

Corporate Indoor

Designed to sit inside your own space — offices, conference venues, foyers, showrooms and exhibition stands. Fits standard office ceiling heights, so your team never leaves the building.

What we supply: the simulator bay you see here — impact screen, netting, turf, tracking, the display and our technician. Stand building, walls, furniture and surrounding branding are not part of our service. At exhibitions our bay must go up *before* your booth walls and counters, so the delivery path stays clear.

2.6 m
HEIGHT3.5 m
WIDTH5.0 m
DEPTH3 hrs
BUILD**Tighter than that? Ask us anyway.**

Width and depth are where we have surprised people — we have set up in smaller gardens and more awkward corners than you would expect. Ceiling height is the one measurement that cannot bend: below the height listed, the ball cannot be struck safely. Send us your measurements before you book and we will tell you honestly whether it works. What we confirm in writing is what applies on the day.

Not sure which fits? *Send us your dimensions.*
